

DOMETIC COOLMATIC MDC 65 Compressor refrigerator 12/24 Volt DC

Product description:

NO LONGER IN PRODUCTION

If you are thinking of replacing your catering absorption fridge with a compressor fridge, then we recommend checking out the MDC range. The dimensions match those of two of the most common absorption refrigerators and replacing old for new is easy. The décor panel can be replaced with your own if desired, and the door hinges and locks can be fitted to open either right or left, whichever suits.

With its patented double lock and vent system this 64 l fridge freezer is also suitable for solar power. Use the sun to keep your food and drink cool!

Circulate and cool

The vent allows hot air to be removed and promotes efficient cooling performance.

Set your own temperature

Vary the temperature as you wish and use energy efficiently.

Light the way

The fridge's light helps you to find what you're looking for.

Flexibly cool

Left or right – the Dometic CoolMatic MDC 65 can be locked and opened whichever way suits you. In busy kitchens with limited space, you need a fridge that won't place any extra constraints on you. This 64 l fridge and freezer is designed to assist you whilst keeping your food and drink cold: featuring a helpful interior light and patented double lock with vent option. Suitable for solar power it won't even drain your energy supplies!
