

HONDA HRS 536 VK Lawnmower

Product description:

Lawnmower HONDA HRS 536 VK

HONDA HRS 536 VK lawnmower with petrol engine, robust, 53 cm wide and side discharge mulching. The HONDA HRS 536 VK is an efficient mower for cutting and mulching, perfect for large gardens. The HONDA HRS 536 VK is one of the lightest and most handy models. If you just need to trim the grass, it will allow you to do it in record time as this mower is ideal for this type of action. Thanks to the ball bearings on all four wheels and the single speed transmission, it will mow the grass as it goes around the lawn. The HONDA HRS 536 VK allows you to choose between side discharge and mulching. All you have to do is open or close the discharge channel, depending on the option you want. In both cases there is no grass catcher bag, so you only stop when you have run out of grass to mow. At this point the work is finished.

Side discharge and mulching

The HONDA HRS 536 VK allows you to choose between side discharge and mulching. To select one of the two options, simply open or close the discharge channel. No sack will get in your way, allowing you to go full power in the lawn.

Durable steel cutting deck

The cutting plates of the HONDA HRS 536 VK lawnmower are durable, durable and lightweight for maximum manoeuvrability.
