## Product description:

MOSA GESX-8000 HBT 6,4 KW Supersilenced AVR Generating Set

MOSA GESX-8000 HBT is a single-phase and three-phase 6,4 KW gasoline-powered generator set with Honda engine, **super-silenced** and voltage regulator with **AVR** technology. The MOSA GESX-8000 HBT is easily transportable, using the special side handles and thanks to its weight of 159 kg.

Even quieter and more efficient than traditional models, the MOSA GESX-8000 HBT generator set delivers a stable and precise three-phase power of 6.4 KW suitable for powering sophisticated electronic equipment that is sensitive to voltage and frequency variations.

So you can easily enjoy all the little conveniences of home wherever you are: lights, fans, a coffee maker, laptops, radio or TV.

## AVR Voltage Regulator

The AVR is an electronic device that performs voltage regulation. The voltage error resulting from the comparison between the voltage to be regulated and a stable reference is virtually cancelled by acting on the rotor excitation current.

The regulation characteristics are much better than those of self-regulated alternators.

The MOSA GESX-8000 HBT generator set is equipped with an 18-liter capacity tank for more than 7 hours of continuous operation at 75% load.

It features a steel frame with engine and alternator mounted on vibration dampers to reduce noise and increase service life. The flush-mounted front panel protects the outlets, controls and instruments from accidental damage while the cowling provides protection for the entire machine. The MOSA generator set is prepared to be connected to the **EAS** automatic start panel, allowing the machine to be used as an emergency unit in the event of a main power failure from the commercial electrical grid.

The MOSA GESX-8000 HBT generator set control panel houses the machine's outlets and controls, including the residual current circuit breaker, circuit breaker and thermal protection.

A **TCM** remote control is also available for the MOSA GESX-8000 HBT genset, allowing engine start/stop up to 10 meters away from the machine.

The MOSA GESX-8000 HBT genset is **suitable for a wide range of uses** such as construction, equipment rental, and events.
