

HELVI fastDARK WELDING MASK

Product price:

138,60 € tax excluded

Product description:

HELVI fastDARK WELDING MASK

HELVI fastDARK is a welding mask that offers optimal face protection by giving the possibility of adjustments according to one's needs.

To offer maximum protection HELVI fastDARK gives the user the possibility to adjust:

- **delay time:** you can adjust the time it takes for the filter to become transparent again once the welding is finished. You can choose a time ranging from 0.1 to 1.0 second .
- **sensitivity:** you can adjust the sensitivity to ambient light.
LO (low) = not very sensitive to light.
HI (high) = very sensitive to light. This setting is ideal for welding at low currents and for welding in dimly lit environments. You can adjust the sensitivity to ambient light.

TECHNICAL FEATURES HELVI tigMAKER 210HF Pulse

Optical Class: 1/1/1/2

Filter Size: 110 x 90 x 9 mm

Visual: 92 x 42 mm

Sensors: 2

Light Level: 4. 0

Darkening degree: 9-13

Moling: YES

Protection adjustment: External. variable degree

UVIR protection: up to DIN 16

Light to dark time: 1/25000 s

Dark to light time: 0. 1 - 1.0 s

Sensitivity/Delay: Continuously adjustable

Power supply: Solar cells and 1 CR2032 battery

ON/OFF: Automatic

Low battery alarm: Yes, red light

Minimum Amp/TIG setting: >10A AC - DC
