Product description:

IRONSYSTEM CCT - 1000/6 CRANE/COLUMN CRAFT

CRANE IRONSYSTEM CCT - 1000/6 is a jib/column crane consisting of a 270° manually rotating jib with a maximum capacity of 1000 kg.

The cranes IRONSYSTEM MCT - 1000/6 are an economic, simple and practical solution, generally used to serve single workstations. In order to simplify the work between the different processing phases, it is also possible to use an overhead crane to connect the workstations and easily move the semi-finished or finished products.

Product features:

Load capacity (Kg): 1000
