AURORA LIGHTING TOWER ZETA L4X320

AURORA ZETA L4X320 is a light tower with hydraulic lifting equipped with 4 floodlights capable of delivering a light output of 320W each.

AURORA ZETA L4X320 is equipped with a galvanized steel lifting tower able to extend up to 7 meters of maximum height, including 4 feet of stabilization to secure the light tower once opened.

AURORA ZETA L4X320 has an input plug and a 16A 230V output socket for the with which it can be combined with other units.

AURORA ZETA L4X320 is designed to be combined with a generator set and can be connected in series in order to use one generator for several lighting units.

The lenses of the AURORA light tower feature extremely special optics designed specifically for the civil engineering and construction sectors.

This innovative fully directional LED lens design ensures maximized light diffusion and reduced waste.

AURORA ZETA L4X320 features extremely compact dimensions and a square shape that optimize and facilitate its positioning and transportation on mobile vehicles. The base, with 4 adjustable and removable anti-tilt stabilizers, guarantees a wind stability of 100 Km/h.
