

DOMETIC COOLPOWER MPS 35 TRANSFORMER 24V

Product description:

DOMETIC COOLPOWER MPS 35 24 V TRANSFORMER

DOMETIC COOLPOWER MPS 35 is a transformer used to connect 24 V cooling devices to 110-240 V power outlets.

DOMETIC COOLPOWER MPS 35 is ideal when your portable refrigerator does not have an AC connection and you want to use it outside of your vehicle: at home, in a hotel, camping or vacation home.

The DOMETIC COOLPOWER MPS 35 transformer works perfectly with any power grid in the world. The adapter can also be connected to 12V or 24V batteries: the built-in priority circuit will automatically set the best available power source.

Even if only a 12 V system is available, it is possible to connect usable 24 V devices. MPS is designed for permanent installation, so it can be placed in a fixed position.

TECHNICAL CHARACTERISTICS DOMETIC COOLPOWER MPS 35

Input voltage (alternating current): 110/230 V

Input voltage (direct current): 12/24 V

Output voltage: 24 V

Output current: 3.00 A

Input frequency: 50/60 Hz

Protection class: IP20

Energy efficiency: 87 %

Continuous power at 25°C: 75.00 W

Min operating temperature: 0.00 °C

Max operating temperature: 40.00 °C

Depth: 160 mm

Height: 55 mm

Width: 115 mm

Net weight: 0.7 kg

Product features:

Frequency (Hz): 50

Voltage (V): 110 - 240

Output voltage (V): 24

Length (mm): 160

Width (mm): 55

Height (mm): 115

Weight (Kg): 0.7
