## **Product description:**

### FENZI G7 IRON TANK FOR DIESEL FUEL 310LT

The FENZI G7 Iron Diesel Fuel Tank 310LT is a product of the highest quality and safety, specifically designed for the transport of hazardous and flammable liquids such as diesel fuel. Made from carbon steel EN 10025 S235JR, the FENZI G7 ensures strength and durability over time, meeting the strictest European standards.

The FENZI G7 model tank has been approved by the Ministry of Infrastructure and Transport in accordance with ADR regulations, confirming its compliance for the transport of hazardous materials. Each tank undergoes rigorous inspections by competent authorities to ensure compliance with necessary safety standards.

A distinctive feature of the FENZI G7 Iron Tank is its double-effect safety valve, designed to prevent content leakage even in the event of vehicle overturning, providing additional protection during transport. Additionally, to facilitate refueling operations, the FENZI G7 can be equipped with a complete pump system including hose and nozzle.

Its cylindrical shape is encased in a robust parallelepiped-shaped metal structure. The FENZI G7 Iron Tank is characterized by an external coating that ensures effective protection against corrosion, guaranteeing long-term durability even in harsh environments.

The FENZI G7 also features a fusible cap and inspection flange, allowing easy access for maintenance and internal inspection. Breakwaters, present in larger capacity models, help to control liquid inertia

during transport,  
although this specific model has a capacity of 310 liters.

Models:

-G7 F45/12

-G7 F70/12

The only differences between the G7 F45/12 and G7 F70/12 models lie in their dispensing power. The F45 offers lower dispensing power, while the F70 is designed to provide higher power, thus meeting different operational needs while maintaining the high quality and reliability typical of FENZI products.

Additional features include lifting eyes and bottom lifting sockets, facilitating tank handling operations.

Interlocking fittings allow efficient use of space, especially during transport or storage. Each tank is equipped with

an identification plate and comes with a user and maintenance manual, along with a certificate from the testing

body confirming product compliance.

The FENZI G7 Iron Diesel Fuel Tank is the ideal solution for those seeking a safe, robust, and compliant container for

diesel fuel transport. Thanks to the use of high-quality materials, carefully designed features, and advanced safety

systems, the FENZI G7 stands out as a reliable and durable product, perfectly suited to meet fuel transport needs.
