Product description:

FENZI G7 IRON TANK FOR DIESEL FUEL 990LT

The FENZI G7 710LT Iron Fuel Diesel Tank is a product of the highest quality and safety, designed specifically for transporting hazardous and flammable liquids such as diesel. Made of EN 10025 S235JR carbon steel, the FENZI G7 ensures durability and strength over time, complying with the strictest European regulations.

The FENZI G7 tank has been certified by the Ministry of Infrastructure and Transport in accordance with ADR regulations, confirming its suitability for transporting hazardous materials. Each unit undergoes rigorous inspections to ensure compliance with high safety standards.

One of the distinctive features of the FENZI G7 Iron Tank is its dual-effect safety valve, designed to prevent leakage even in case of vehicle overturning, enhancing safety during transport. To facilitate refueling, the FENZI G7 can be equipped with a complete pump with hose and nozzle.

Its cylindrical shape is enclosed in a robust parallelepiped-shaped metal structure. The FENZI G7 Iron Tank is protected by an external coating that ensures long-lasting durability and corrosion resistance, even in harsh environmental conditions.

Additionally, the FENZI G7 is equipped with a fusible plug and an inspection flange to facilitate internal maintenance and inspection. Break-flow partitions are designed to control liquid inertia during transport, despite the tank's

specific capacity of 990 liters.

Models:

-G7 F45/12

-G7 F70/12

The only difference between the G7 F45/12 and G7 F70/12 models lies in their dispensing power. The F45 model offers lower dispensing power, while the F70 is designed to provide greater power, meeting various operational needs and ensuring the high quality and reliability typical of FENZI products.

Other features include lifting rings and bottom lifting sockets, which facilitate tank handling operations. Cross fittings allow efficient space utilization, especially during transport and storage. Each tank is equipped with an identification plate and comes with a user manual, maintenance guide, and certification from the testing body confirming product compliance.

The FENZI G7 iron diesel tank is the perfect solution for those seeking a safe, durable container compliant with diesel fuel transportation regulations. With high-quality materials, careful design, and advanced safety systems, the FENZI G7 stands out as a reliable and long-lasting product, ideal for meeting fuel transportation needs.

Technical Specifications FENZI G7 Iron Tank:

Capacity: 990 litres

Width: 1070 mm.

Length: 1890 mm.

Height: 1300 mm.

Weight: 246 kg.
