**Product description:**

**FENZI G10 STORAGE TANK WITH GRILLE 670LT**

The FENZI G10 Storage Tank with Grille 670LT is an ideal solution for safely containing and storing contaminating liquids. Made from adequately thick carbon steel, it is available with both external paint and zinc coating to ensure resistance and durability over time.

The zinc-coated grating provides a safe and non-slip surface.

The dimensions are designed to optimize the cost/practicality ratio. The FENZI G10 Tank features a reduced height of 350 mm, facilitating access to stored liquids while maintaining a containment capacity of 525 liters.

**Usage**

The FENZI Storage Tank is extremely versatile and suitable for multiple uses. Besides being commonly used for storing new oil drums, it is also useful for cleaning components contaminated by polluting liquids. This versatility makes it indispensable in industrial environments where safe fluid management is crucial.

**Accessories and Specifications of the FENZI G10 Tank:**

Upon request, various accessories are available to optimize the use of the FENZI G10 Storage Tank, including supports for drums and ramps to facilitate access with manual carts.

The standard dimensions include a width of 850 mm and a depth of 1000 mm, optimized to fit various work environments without compromising practicality.

This versatility extends to various industrial applications, making it indispensable for ensuring safe

fluid management and compliance with regulatory standards.

The FENZI G10 Tank is essential for the industrial sector, ideal for both storing new oil and safely cleaning contaminated components, ensuring a work environment compliant with current regulations. The FENZI G10 Storage Tank with Grille is the ideal option for those needing a robust, safe, and versatile product for various industrial and commercial applications. Its high-quality construction, along with compliance with current regulations, guarantees reliable and durable performance.
