Product description:

ITALTOWER MT55 WITHOUT LUMINAIRES

ITALTOWER MT55 without luminaires: the solid base for your lighting needs

The ITALTOWER MT55 without luminaires is the backbone of a professional lighting system, customisable to your specific needs. This solid and durable light tower is designed to offer maximum flexibility and reliability in various applications.

Main technical characteristics:

Maximum height of 5.5 metres: Achieve optimal illumination even in large areas, thanks to the tower's adjustable height.

Manual lifting system: Easy and intuitive, allowing you to adapt the height of the tower to your needs quickly and safely.

Wind resistance up to 80 km/h: Ensures stability and safety even in adverse weather conditions.

Adjustable stabilisers: Ensures a solid and secure base on any type of terrain.
