## **Product description:**

### BM2 HOT AIR GENERATOR EC 55

BM2 EC55 is an oil-fired hot air generator, with integrated indirect combustion burner, equipped with a heat exchanger that allows the evacuation of fumes through a chimney connected to the outside.

BM2 EC55 thanks to its characteristics, can be used inside closed rooms, on the other hand have a higher cost and an efficiency around 90%, having to calculate, in reduction, the amount of heat evacuated through the chimney.

The BM2 EC55 hot air generator comes complete with:

- Integrated oil burner
- Socket for connection to thermostat, humidistat or timer
- Power supply cable (1.5 m) with plug
- Combustion chamber in stainless steel AISI 430; four smoke passes
- Timed after-ventilation for cooling the combustion chamber
- Electronic flame control
- Overheating thermostat
- Fuel oil feeding hoses in hydrocarbon-resistant rubber with metal mesh covering
- Steel tank
- Bayonet tank closure cap
- Fuel drain plug from tank
- Electric control panel
