Product description:

BM2 RIELLO LPG BURNER + GAS RAMP FOR JUMBO 235 LPG

BM2 RIELLO LPG burner + GAS ramp is a replacement component for the JUMBO 235 LPG heat generator. It is a low-emission burner designed to provide efficient and environmentally friendly heating.

The BM2 burner is made of refractory material, which makes it resistant to high temperatures. It features a double-layer combustion chamber, which reduces NOx emissions.

BM2 has a combustion efficiency of 98 percent, compared with an average of 90 percent for standard burners.

efficient BM2 combustion is important for reducing pollutant emissions and improving energy efficiency.

BM2 GAS ramp is a component that supplies gas to the burner. It is made of corrosion and wear-resistant material.

The BM2 is easy to install and operate. You need to follow the instructions provided by the manufacturer.

Here are the advantages of the BM2 RIELLO LPG burner + GAS ramp:

High efficiency BM2

The RIELLO LPG BM2 burner + GAS ramp is a high-quality product that provides efficient and environmentally friendly heating. It is an excellent choice for those who wish to replace the burner of their JUMBO 235 LPG heat generator.

BM2 burner is made of high quality materials, which ensure long life and resistance to high temperatures

BM2 burner is a reliable and efficient way to heat homes and businesses. It is an excellent choice for anyone looking for a high-quality burner that is easy to maintain

Low emissions

High-quality materials

Easy installation and operation

The BM2 RIELLO LPG + GAS ramp burner is an innovative product that represents an important technological breakthrough in the field of heat generators.

The BM2 RIELLO LPG + GAS ramp burner is a high-quality product, offering superior performance and reliability compared with traditional products.
