

SINCRO EP2 95H Single Phase Synchronous AC Alternator 3.5 kVA Capacitor

Product description:

SINCRO EP2 95H ALTERNATOR 4,3KVA SINGLEPHASE

SINCRO EP2 95H singlephase alternator with a power of 4,3KVA, this unit has a Brushless operation equipped with capacitor voltage regulator.

The SINCRO EP2 95H is foreseen for the operation at frequency 50 or 60 HZ, the possibility to work on these two frequencies makes possible its application for any service voltage increasing its versatility, for the correct operation. For correct operation it is only necessary to verify that the calibrations are correct for the intended use.

All the components that make up the SINCRO EP2 95H are subjected to a specific coating and/or impregnation process to safeguard the functionality of the generator and to protect the critical parts in the various conditions of use.

For extreme weather conditions, models are available that also guarantee the IP23 standard, which provides protection against water up to 60° from the vertical. SINCRO EP2 95H is a brushless alternator, this feature together with the high efficiency of the regulator ensure a low level of interference with radio waves.

The alternator SINCRO comes with capacitor voltage regulator thanks to which it is possible to convert alternating current with time-varying frequency and voltage into direct current with constant voltage and thus allows to avoid current surges.
