Product description:

TELECO TELAIR TeleplusX2-39U Digital and Analog Terrestrial Antenna

The TELECO TELAIR TeleplusX2-39U Digital and Analog Terrestrial Antenna represents the technological evolution of the TELEPLUS antenna, carefully designed to ensure superior performance in receiving both digital and analog TV signals. This TELECO TELAIR TeleplusX2-39U antenna is designed to meet the needs of those seeking a versatile, reliable device capable of receiving signals even under challenging conditions.

Thanks to its innovative polarity orientation mechanism, the TELECO TELAIR TeleplusX2-39U allows for the reception of TV signals transmitted in both horizontal and vertical polarities, optimizing viewing quality. This feature is particularly useful in countries such as Italy and England, where the distribution of vertically polarized signals is increasing with the advent of digital broadcasting.

Main features of the TELECO TELAIR TeleplusX2-39U:

High gain: with a low-noise integrated amplifier, the antenna achieves a maximum gain of 38 dB for UHF channels (21-48).

Universal compatibility: powered by 12 Vdc or 24 Vdc, ideal for motorhomes and recreational vehicles.

Integrated LTE filter: eliminates interference from 4G/5G smartphones, ensuring stable reception even in countries where LTE transmissions occupy the 700-800 MHz band.

Versatile design: the wedge spacer ensures a perfect fit for any roof shape, while the pole locking system ensures easy and secure installation.

Advanced technology and features of the TELECO TELAIR X2-39U:

The TELECO TELAIR Teleplus X2-39U Digital and Analog Terrestrial Antenna uses high-quality materials such as zamak for the orientation mechanism, ensuring durability and resistance to wear. The 39 cm pole, designed for discreet installation inside a cabinet, makes it ideal for modern vehicles with limited space.

The TELECO TELAIR TeleplusX2-39U Digital and Analog Terrestrial Antenna is the perfect choice for those seeking reliable and high-quality reception for both digital and analog broadcasts. Its advanced features, combined with an ergonomic design, make it an essential accessory for maximum comfort during travel.

Choose the TELECO TELAIR TeleplusX2-39U Digital and Analog Terrestrial Antenna for uninterrupted entertainment wherever you are.

Product features:

Type of coupling head: Wall bracket

Product type: Digital Terrestrial Antenna

Antenna orientation: Manual

Satellites Number: No (Digital)
